9th Summer Training Program on "Build Your Own Smart Device"

7th Summer Training Program on "Build Your Own Smart Device" was conducted by **Prof. S. R. N. Reddy**, Department of CSE in collaboration with Microsoft, Intel and MHRD. This includes the interactive hands on sessions with a projects based on above technologies. This program aim to bridge the gap between academics and industry by providing the practical platform and cutting edge technology into the class room in collaboration with Industry from 11th June, 2018 to 21st July 2018. There was some experts from Microsoft, ARM, Intel and Atmel with whom we have collaboration. Project staff and dept faculty was also be engaged for some sessions (Lab/projects). Students from various courses, departments and colleges took part in this workshop. Approx. 40 students registered.

Following basic topics were discussed:

- Smart Device Architecture
- Mobile Application Development
- Embedded board 8051
- IOT and Embedded System
- Hardware platform Raspberry Pi, ARM, Snapdragon and 8051Board.
- Android Studio and Android Programming.
- Python programming and App development
- Cloud Computing and Introduction to Fuzzy Logic
- Product designing and development.
- Working on live project.

During the practical sessions, students executed various experiments of Internet of Things. Students performed the hands-on session based on these techniques. Students were given advanced case study-based programming exercises to be performed in the STP sessions based on the topics mentioned above.
